

Abel ERP for Plastics Manufacturing

Visibility - Traceability - Control

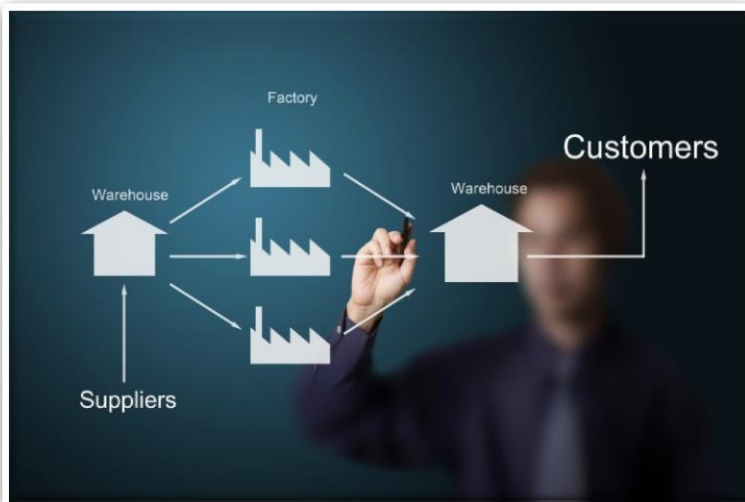

Abel ERP gives the plastics industry the flexibility and scalability needed to increase revenue, improve cash flow and reduce waste. Abel is designed to give plastics manufacturers greater control of operations through unmatched visibility, traceability and automation.

The plastics industry is dynamic with a competitive global market place. To be successful a business needs to know what its Revenue is going to be, what its costs are and how efficiently it is getting products out the door.

If an Enterprise wants to implement Lean manufacturing processes, effectively meet delivery on time to customer requests and have outstanding quality standards the Abel ERP for Plastics Manufacturers is the system to use.

Abel gives an Enterprise the visibility needed to consistently make the right choices. The end to end integration of Abel allows procurement manufacturing, sales and distribution to view real time information and make the right decisions to maximise efficiency and effectiveness. Integrated parallel scheduling allows complex supply chains to be managed in a fully integrated singular view.

Abel ERP for plastics has the scope to effectively run the operations for original equipment manufacturers (OEM), service providers, bespoke or consumer plastics producers and any combination thereof. With Abel ERP for Plastics Operations Accounts Sales Service will all be fully integrated without the need for expensive interfaces or software development.

Robust Supply Chain Flexibility

Manufacturing Plastics requires maximising the supply opportunities of a global market place. Abel ERP provides the system to effectively manage suppliers tracking cost and consumption, international currency fluctuations and automatically measures supply lead times.

Complex Plastics Manufacturers supply chains benefit from Abel ERP's purchasing being integrated with sales, stock, receipting invoicing and dispatch. Abel ERP's ability to automate procurement saves businesses from creating waste and provides a focus on

achieving lower cost structures and better more accurate lead times. Abel allows stock levels to be optimised through integration. Abel provides a complete view of stock enabling an enterprise to optimise manufacturing and continuously improve delivery to 'on time to customer request'.

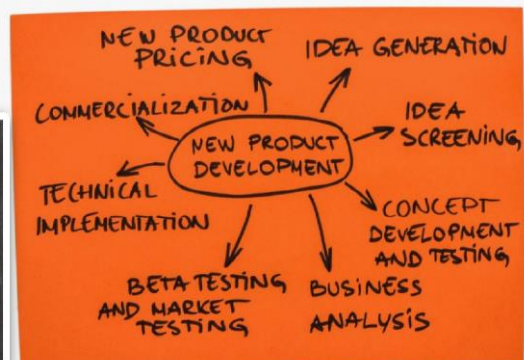

Plastics Manufacturers can now reliably adapt the supply chain to the demands of Production, Research and Development, Quality, Service Sales and Accounts. Abel has the flexibility and traceability to quickly view and correct issues. From tracking stock consumption through multiple warehouses to global purchasing contracts or traceability to component level Abel ERP for Plastics Manufacturers is the most robust cost effective system available.

Get to market... fast

Abel ERP for Plastics Manufacturers improves Enterprise efficiency through integrating customer relationship management, accounting, manufacturing and delivery. You can track quotations to customer against invoice trends, automate supplier status, have traceability through supply, production and dispatch to component level with only single time data entry.

The visibility traceability and automation inherent in Abel ERP for Plastics Manufacturers minimises waste and quickly identifies overlaps in resources that carry real cost to the profitability of an organisation

The time it takes to get new ideas to market is improved through integrating BOM's, Drawings and SOP's with internal applications such as procurement, financials manufacturing and quality systems.

Abel also allows you to match new design builds with existing inventory components identifying the most cost effective suppliers and processes. The continuous improvement culture that

allows business to maintain the competitive edge in the global plastics market is eminently achievable with the flexibility and scalability of Abel ERP.

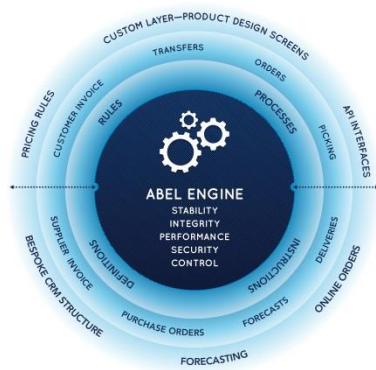

Efficient integration of engineering prototypes to the production line is handled through Abel ERP BOM's and Designer BOM's capability. Whether it is a unique or for a 1million items Abel will only require single point data entry and will provide unmatched traceability.

Have the Manufacturing System you want

Abel ERP for Plastics Manufacturers is implemented to match the business system you want today and has the flexibility and functionality to be the business you need tomorrow.

The exceptional parallel production scheduling capability integrates across business functions allowing for accurate capacity planning. Accurate production analysis allows for accurate financial analysis which in turn improves the bottom line.

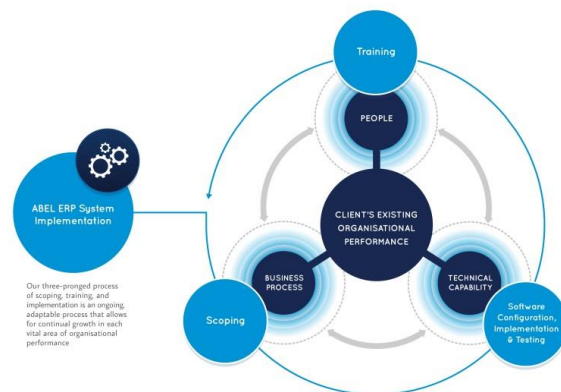

Abel ERP has the capability to handle demand driven lean manufacturing or mass production. If a business wants to transition from mass production to Lean production then Abel ERP has the ability to flex and adapt to changing and dynamic business processes.

Whatever your business process Abel ERP has to ability to get you to where you want to be.

Performance functions for Plastics Manufacturing

- Supply Chain management
- Lean Production
- Corporate View
- Inventory Management
- Enterprise Portal integration
- Demand Planning and Forecasting
- Field Service Management
- Specialised pricing features
- Foreign Currency handling
- Fully Integrated financials

You are Unique so Abel ERP for Plastics Manufacturing is flexible

Abel ERP for Plastics manufacturers is a fully integrated, non modular, industry specific ERP that has the flexibility to meet even the most complicated operational requirements. Be it a QDIP daily management meeting or a quarterly financial meeting Abel has the reporting functionality to give an organisation real time up to the minute information whenever required.

If it's a sales team meeting or a QA review Abel will give you the information you need to gain insight and analysis to make the right decisions for your business.

Partner with Specialists

Abel has designed a system for plastics manufacturers and implements it using trained specialists who have expertise in the industry. Providing insight and perspective they smoothly plan, implement, Train and support your organisation working collaboratively to deliver the system that is right for you. With specialised understanding, service and support you get a world class solution that will be supported as you exceed your growth expectations

Grow without Constraints

As a business you need an ERP that meets your needs of today and your aspirations for the future. Abel ERP for Plastics Manufacturers is designed to adapt as your business environment changes without having to purchase a new business system or engage in expensive business system redevelopment. This unique capability makes Abel ERP for Plastics exceptional value for any growing plastics business.
